

1. High-Level Overview

1.1 Game Title

Ocean Treasure Flow

1.2 Elevator Pitch

Ocean Treasure Flow is an underwater reflex-based collection game where players control a floating character who swims forward by opening their chest and collects treasures by stretching their hands. The game challenges coordination and reaction speed as obstacles appear and swimming speed gradually increases.

1.3 Genre

Casual / Reflex-Based Collection Game / Endless Survival

1.4 Target Platform(s)

Primary Platform: PC

Future Scope: Motion-based input integration

1.5 Target Audience

Age Range: 12+

Player Type: Casual players, reflex-training players, arcade game lovers

1.6 Unique Selling Points (USP)

- Underwater floating-based movement
 - Gesture-inspired swimming mechanics
 - Progressive speed challenge
 - Treasure-focused collection system
 - Simple and accessible controls
 - Endless survival gameplay
-

2. Design Pillars

- Simplicity – Easy-to-understand mechanics
 - Flow – Smooth underwater movement
 - Progression – Gradually increasing difficulty
 - Focus – Clear objectives and feedback
-

Miss Counter System: Game ends after exceeding miss limit

4.3 Game Systems

- Treasure Collection System
 - Score Calculation System
 - Miss Tracking System
 - Obstacle Spawn System
 - Speed Progression System
 - Game Over System
-

5. Level & World Design

5.1 World Structure

Endless underwater environment

5.2 Environment Elements

- Coral reefs
 - Floating sea plants
 - Rock formations
 - Bubbles and light rays
-

6. Story & Narrative

6.1 Story Summary

The player explores the ocean depths searching for hidden treasures while navigating underwater obstacles. The journey becomes more challenging as the ocean currents intensify.

6.2 Setting

Bright, colorful underwater world with dynamic lighting effects.

7. Art & Visual Style

7.1 Art Direction

Vibrant underwater theme with smooth animations.

7.2 Color Palette

Blue – Water environment
Gold – Treasure
Green – Sea plants

Red – Warning indicator
White – Score and UI elements

8. Audio Design

8.1 Music

Calm underwater ambient music

8.2 Sound Effects

Treasure collect sound
Swimming movement sound
Obstacle warning sound
Game over sound

9. Technical Design

9.1 Engine & Tools

Unity Engine
C# Scripting

9.2 Target Performance

60 FPS
Smooth animation transitions

10. One-Sentence Vision Statement

"This game is about creating a smooth underwater treasure-collecting experience where players feel immersed, reactive, and progressively challenged."
